

## PowerOn

### *Emergency Power Systems*

In response to a renewed focus on disaster planning strategies, Hill PHOENIX® has developed unparalleled expertise in the application of emergency power. PowerOn™ emergency power applications help customers deal with the unpredictable and financially devastating nature of power outages.

**Hill PHOENIX**  
POWER SYSTEMS®

Our full range of design and product integration services offers customers protection ranging from crucial data networks to entire store backup power in the event of brief or extended power outages. Whether the situation demands a new store design or turnkey answers for retrofitting existing stores, Hill PHOENIX Power Systems has a PowerOn answer to meet your needs.

### Customized Complete Answers

- Simple UPS and power quality answers integrated with electrical gear
- Permanently installed generator and ATS solutions
- Mobile power generation quick-connect capabilities with mechanical interlocking dual main breaker or MTS
- Stand-alone answers or integrated with a total power distribution design

### Disaster Preparedness Strategy

- Comprehensive protection programs that insure total system reliability
- Technology consultation, industry partnerships
- Regulatory code compliance

### Turnkey Project Management

- Single point of contact for design, delivery, installation and start-up coordination
- Retrofit programs for existing stores

### Customer Benefits

- Ability to generate revenue when competition is without power and closed
- Merchandise and Network Protection
  - Systems pay for themselves after only a single event
- Enhanced store safety for employees and customers
- Reduced engineering and installation costs
