PowerWall

Innovative Power Distribution for Convenience Stores

powerWALL

PowerWall is a cost-effective, flexible power distribution and control system for today's convenience store requirements.

Contact us today and let us design a unitized PowerWall for your stores.

Why PowerWall?

- Single-source supplier simplifies switchgear procurement and code-compliant controls to streamline construction, startup and operations.
- PowerWall® units incorporate commercial-grade components that are pre-assembled, pre-wired and tested in a factory-controlled environment, UL 508 & 891 Listed.
- Wide range of cabinet designs offer more flexibility and reduce wall space by 30%+.
- Support during project design, construction and store operations.
- Unique interfaces for quick connections to mobile generators.
- All subsystem controls available as standalone units for retrofits to maintain same control consistently at all locations.

Benefits Inside the Store.

- Compact design maximizes your return on sales floor space and opens up storage space.
- Optional power quality offerings for POS network and critical electronics (TVSS & UPS systems).
- Optional Building Management System is scalable to meet your requirements. Key features include; remote monitoring and/or equipment control for HVAC, monitoring coolers, cooler doors, Grab'n Go cases and other energy-saving features.

Benefits Outside the Store.

- Pre-engineered, code-compliant fueling system to meet NEC & NFPA.
- Seamless integration of fueling controls (both low and high voltage) for fuel system maintenance, serviceability and complete fuel system shutdown.
- Fueling controls are scalable to meet site requirements.
- Submersible contactors incorporated for product pumps.
- Dispenser and product controls are pre-wired to terminal strips and labeled for easy field connections and field service.
- Options to pre-install owner-supplied devices, such as tank monitors, data boxes and VFC's.
- Optional exterior lighting controls for signage, canopy lighting and site lighting.
