* For sizing all refrigeration equipment other than TYLER, use conventional BTUH values.
** Evaporator temperature is defined as the saturated pressure leaving the case.
*** Air velocity measured 1 hour after defrost at the discharge air duct using an ALNOR JR. velometer with a scoop.

Use the NM cases for critical temp applications.

For specific compressor sizing information, refer to Tyler Applications for Rack System Compressors and/or the Compressor Manufacturers for single compressors. For line sizing information, refer to the Miscellaneous Section "BUFF" in the Tyler Specification Guide.
